Fire Danger Moved to **MODERATE** in Missoula Area

Effective Friday, May 14, 2021

Residents and Visitors Asked to Still Use Caution When Outdoors!

May 14, 4:00 PM- Missoula, Montana – Due to increasing temperatures and drying vegetation, wildland fire officials with the Missoula County Fire Protection Association (MCFPA) have raised fire danger within Missoula County to **MODERATE**, effective immediately.

Debris burning with permit is still open, but MCFPA urges all outdoor burners to not burn on windy days and to make sure to activate their permits every day they intend to burn. Everyone who burns needs to have water on-scene and a tool suitable for throwing dirt on an escaping fire prior to ignition.

Missoula County fire resources have been busy this spring with numerous escaped debris burns. Please be vigilant if you do decide to burn.

For more information on fire prevention visit www.MCFPA.org. Recreators are also encouraged to visit www.BeOutdoorSafe.org to plan a safe, fun visit to our incredible Montana wilds.
